Seeking full-time Full Stack Developer roles

PROFILE SUMMARY

Full Stack Engineer (React, TypeScript, Go, Node.js, PostgreSQL) with close to a year of production experience. Delivered 17+ modules for a live hospital management system and independently shipped two live platforms with payments and real-time features. Comfortable owning a feature from schema design to deployment.

TECHNICAL SKILLS

Languages & Frontend: TypeScript, JavaScript, React, Next.js 15/16, HTML5, CSS3, Tailwind CSS

Backend: Golang, Node.js, Express, REST APIs, Prisma ORM, MQTT, Socket.io

Databases: PostgreSQL, MySQL — schema design, complex joins, subqueries, views, indexes, constraints, transactions

Cloud & Platforms: Supabase, Vercel, Render, Neon, Razorpay API, Resend (transactional email), Cloudinary

Tools: Git, GitHub, Linux, VS Code, Playwright (E2E testing)

PROFESSIONAL EXPERIENCE

Sanrado Techsolutions LLP, Tiruppur

Jul 2025 – May 2026

Software Engineer – I

Oct 2025 – May 2026

- Earned promotion from Intern to Software Engineer – I within 3 months based on performance
- Delivered 17+ full-stack modules for a production Healthcare Information Management System (HIMS) using React, TypeScript, Golang, and PostgreSQL
- Eliminated recurring data-mismatch defects across modules by aligning frontend TypeScript models with backend seed configurations
- Built an MQTT-based real-time monitoring system to track hospital equipment status across the facility
- Secured REST APIs for patient registration and inventory management with authentication controls, protecting sensitive healthcare data
- Designed normalized PostgreSQL schemas and tuned queries, joins, and indexes to speed up reporting
- Troubleshoot production deployment and database issues, keeping the live system stable and available

Software Developer Intern

Jul 2025 – Sep 2025

- Onboarded onto a live production HIMS codebase, gaining hands-on exposure to the complete software development lifecycle
- Contributed to feature development using HTML5, CSS3, JavaScript, Next.js, Golang, React.js, Git, and PostgreSQL

KEY PROJECTS

Milky Mushroom – E-Commerce Platform

2026 – Present

Independent Project (Family Business) | Full Stack Developer | milkymushroom.in

- Architected and launched a production e-commerce platform for a family agri-business using Next.js 15, Supabase (PostgreSQL), and Tailwind CSS
- Automated the payment and notification flow end-to-end with Razorpay and Resend transactional email
- Built a verified-purchase review and rating system, automated shipment-tracking alerts, and route-level authentication guards for customer and admin dashboards
- Optimized performance to Google PageSpeed scores of 93 (mobile) and 100 (desktop)
- Owned the full product lifecycle solo, from architecture and development to CI/CD deployment on Vercel

Yazhisai Cloud Kitchen – Slot-Based Meal Pre-Ordering Platform

2026

Freelance | Full Stack Developer | yazhisaicloudkitchen.in | [GitHub](#)

- Designed and deployed a 4-role (Customer, Admin, Chef, Rider) ordering platform using Next.js, Express, Prisma, and PostgreSQL, live on a custom domain with SSL
- Built a real-time order pipeline with Socket.io, delivering live GPS delivery tracking, slot/cutoff-based scheduling, and instant order alerts
- Integrated Razorpay live payments (server-side HMAC verification, idempotent webhook fallback) and Resend transactional email; secured all roles with JWT/httpOnly-cookie authentication and rate limiting
- Shipped an admin analytics dashboard and a 16-case Playwright E2E suite validating the full order lifecycle across all four roles

EDUCATION

MCA – Dr. SNS Rajalakshmi College, Coimbatore | CGPA: 8.1

2025

BCA – St. Joseph's College, Tiruchirappalli

2023
