MOHANRAJ S

Full Stack Software Engineer | Unity Game Developer

Dindigul / Coimbatore, Tamil Nadu • Immediate Joiner • +91 86107 55195 • mohanrajapm@zohomail.in
Portfolio: mohanraj-portfolio-chi.vercel.app • github.com/EcomMohanraj • linkedin.com/in/mohanraj-s-3111b1215

PROFILE SUMMARY

Full Stack Software Engineer with close to a year of experience shipping production systems, from an enterprise Healthcare Information Management System (HIMS) to independently deployed e-commerce and cloud-kitchen platforms, plus a 3D Android racing game built in Unity and C# and published on Google Play. Seeking full-time Full Stack Developer or Game Developer roles.

TECHNICAL SKILLS

Languages & Frontend: TypeScript, JavaScript, C#, React, Next.js 15/16, HTML5, CSS3, Tailwind CSS
Backend: Golang, Node.js, Express, REST APIs, MQTT, Socket.io, JWT authentication
Databases: PostgreSQL, MySQL (joins, subqueries, views, indexes, constraints, transactions), Prisma ORM
Game & Mobile: Unity 6 (URP), C#, game AI, mobile optimization, Android (IL2CPP, AAB), Google Play Console
Cloud & Platforms: Supabase, Vercel, Render, Neon, Razorpay API, Resend, Cloudinary
Tools: Git, GitHub, Linux, Kali Linux, VS Code, Playwright (E2E testing), Docmost, AI-assisted development (Claude Code)

PROFESSIONAL EXPERIENCE

Software Engineer – I | Sanrado Techsolutions LLP, Tiruppur *Oct 2025 – May 2026*

- Promoted from Intern to Software Engineer – I within 3 months based on performance
- Engineered 17+ full-stack modules for a production Healthcare Information Management System (HIMS) using React, TypeScript, Golang and PostgreSQL
- Eliminated recurring data-mismatch defects by syncing frontend models with backend seed configurations
- Architected an MQTT-based real-time monitoring system for hospital equipment status
- Secured REST APIs for patient registration and inventory with authentication controls, protecting healthcare data
- Designed normalized PostgreSQL schemas and optimized queries and indexes to speed up reporting

Software Developer Intern | Sanrado Techsolutions LLP, Tiruppur *Jul 2025 – Sep 2025*

- Delivered HIMS features on a live production codebase using Next.js, React, Golang and PostgreSQL

Project Intern (MCA Final-Year Project) | Hackup Technology, Coimbatore *Dec 2024 – Mar 2025*

- Built a Wi-Fi Jamming Detection system that flags signal interference in real time through buzzer and LED alerts, and validated it against jamming simulated in a controlled lab setup to analyse signal disruption

KEY PROJECTS

TN Bike Race – 3D Motorcycle Racing Game for Android *2026 – Present*

Independent Project | Unity 6 (URP), C#, Android | Live on Google Play

- Designed and built a 3D racing game with 11 stages modelled on Tamil Nadu roads (city, highway, village, forest, hills, monsoon and more), plus career mode, garage, bike upgrades and Tamil-language signage
- Implemented core race systems: AI riders with traffic-aware overtaking, checkpoints and respawns, live race positions, surface-based physics (grip, off-track slowdown, water crossings), and touch and tilt steering
- Optimized for budget Android phones with mesh merging, texture atlases, distance culling and shadow LODs, cutting draw calls by up to 28% per stage against a 150-draw-call / 300K-triangle budget
- Built Unity editor tools for automated full-race soak tests, checkpoint probes and render-budget checks
- Published on Google Play after closed testing with 12+ testers for 14+ days and 3 feedback-driven updates (v1.0.1–v1.0.3); managed with Git branching, milestone reviews and AI-assisted coding

Milky Mushroom – E-Commerce Platform *2026 – Present*

Family Business | Full Stack Developer | Next.js 15, Supabase, PostgreSQL, Tailwind CSS | milkymushroom.in

- Architected and launched a production e-commerce platform for a family agri-business with Razorpay payments, Resend email and CI/CD on Vercel
- Built verified-purchase reviews, shipment alerts and route-level auth guards; PageSpeed 93 (mobile), 100 (desktop)

Yazhisai Cloud Kitchen – Slot-Based Meal Pre-Ordering Platform *2026*

Freelance | Next.js, TypeScript, Express, Prisma, PostgreSQL, Socket.io | yazhisaicloudkitchen.in | GitHub

- Architected and deployed a 4-role (Customer, Admin, Chef, Delivery Rider) ordering platform on a custom domain
- Built a real-time Socket.io order pipeline with live GPS tracking, slot/cutoff scheduling and instant alerts
- Integrated Razorpay live payments with server-side verification and Resend email, secured all roles with JWT/httpOnly-cookie auth and rate limiting, and wrote a 16-case Playwright E2E suite

EDUCATION

MCA | Dr. SNS Rajalakshmi College of Arts & Science, Coimbatore *2025 | CGPA 8.1*

BCA | St. Joseph's College, Tiruchirappalli *2023 | CGPA 6.91*
